CIS Critical Controls v8 - Compliance Assessment
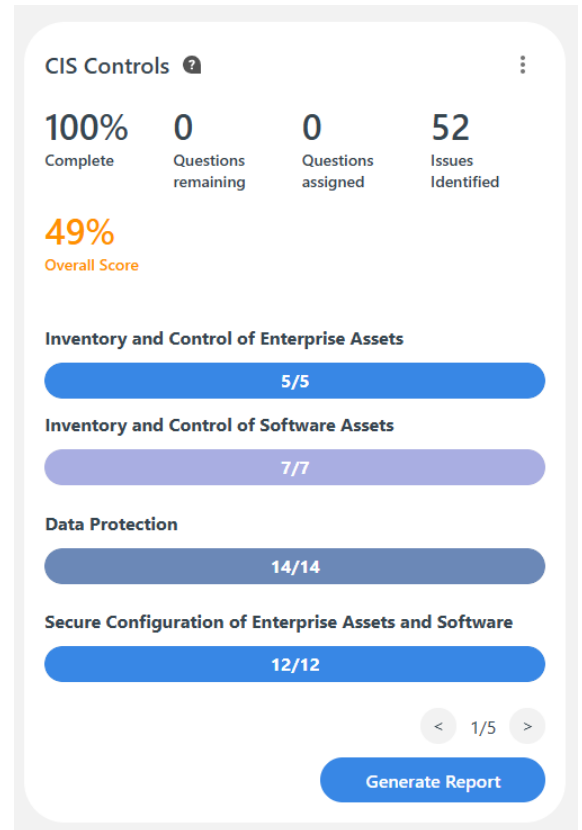

Track implementation, find compliance gaps, upload evidence, collaborate, generate assessment report

Track and Assess the Implementation of all CIS Critical Controls v8 Safeguards

CYRISMA's CIS Critical Controls v8 Assessment includes a complete suite of functions to track and assess your implementation of all 153 CIS Controls v8 Safeguards. Like all CYRISMA features and updates, the assessment is available to CYRISMA Partners at no additional cost.

Simplify CIS Controls tracking, upload evidence, and generate customizable reports. Map tactical controls to the vulnerability, configuration and data scans performed using CYRISMA, and close compliance gaps easily.

The Assessment is just one part of CYRISMA's larger GRC and Compliance module which includes Microsoft Copilot Readiness Assessment, HIPAA, NIST CSF 2.0 and PCI DSS Compliance Assessment, AD Monitoring, Industry Comparison, and Tactical Compliance tracking with multiple frameworks!
