CyberSecure Canada - Compliance Assessment

Track implementation, find compliance gaps, upload evidence, collaborate, generate assessment report
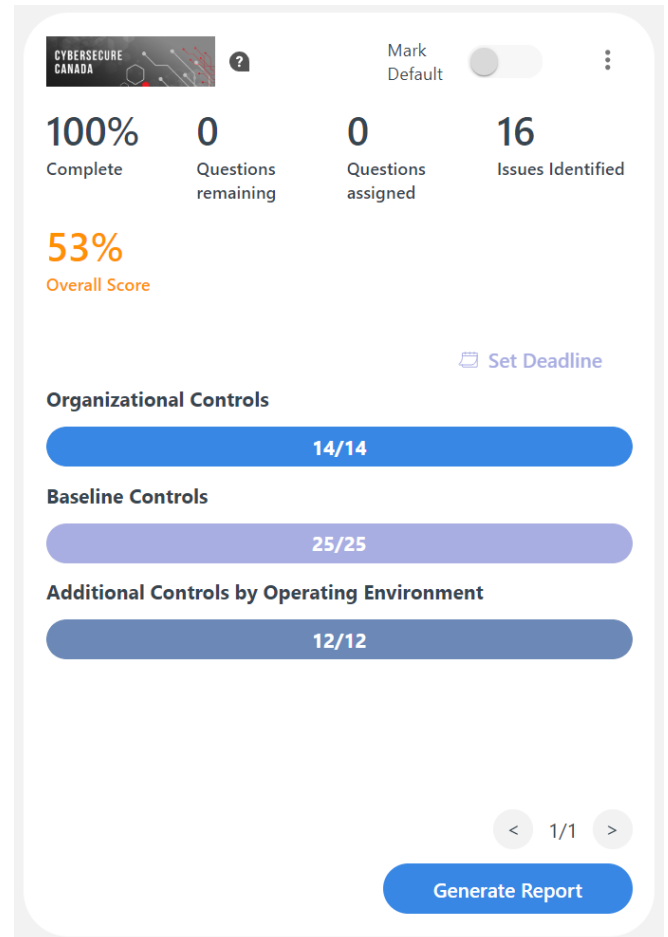

Track and Assess the Implementation of all CyberSecure Canada requirements

CYRISMA's CyberSecure Canada Compliance Assessment includes a complete suite of features to track and assess your own and your clients' implementation of all 51 CyberSecure Canada controls.

The controls are tracked under the following three categories: Organizational Controls (14), Baseline Controls (25), Additional Controls by Operating Environment (12)

Simplify CyberSecure Canada compliance tracking, upload evidence, and generate customizable reports. Map tactical controls to the vulnerability, configuration and data scans performed using CYRISMA, and close compliance gaps easily.

Other frameworks covered by the CYRISMA Platform are NIST CSF, CIS Controls, Microsoft Copilot Readiness Assessment, HIPAA, the Cyber Essentials, PCI DSS, the Essential 8 and more!
